IMPRINT ENTERPRISES 
SINCE 1975

Why We Are Different

Best Total Value

We offer the best value for your barcode needs: competitive prices, premium quality, and top-of-the-line customer service.

Relationship You Can Count On

Our goal is to become your strategic business partner — a supplier you can trust and count on for consistency in products and services. Leverage our 28 years of experience, knowledgeable technicians and high quality solutions to ensure your operations run as smoothly and cost-effectively as possible.

Experience and Product Knowledge

Need a recommendation on what type of printer or label to use in a certain application? We have been in the barcode marketplace since 1975 and are experts in barcode printers and scanners.

On-site Repairs and Troubleshooting

We offer certified on-site service for your barcode problems, repairs, and troubleshooting. You can count on Imprint to get you out of a jam.

Emergency Stocking Programs

Having a hard time managing your label or ribbon inventory? Our warehouse is your warehouse. We offer emergency stocking programs that give you a back-up plan and prevent any out of stock issues with any of your barcode labels and ribbons.

Elite Status

Imprint is a premier partner with industry leaders such as Zebra and Honeywell. We get the best pricing and program offers, which we in turn offer to you.

“Green” Products

For companies that have a green initiative, Imprint carries the only environmentally friendly, solvent-free ribbon in the marketplace.

Unique Programs

Imprint offers cutting-edge programs to keep your prices low and offer you the most flexibility.

- Zebra and Intermec Trade-In Program: Take advantage of “Cash for Clunkers” on printers while the money is on the table.
- Imprint’s Refurbished Hardware Offering for your barcode printers and scanners: Buying refurb hardware vs. new can save your company considerable money.

Digital Custom Labels

Make a lasting impression on your customers. Imprint is one of a select few label companies to own HP Indigo presses. Digital printing allows you to have your labels done in high-definition without the usual high price.

About Imprint Enterprises

Imprint Enterprises has been in business since 1975 and is focused on providing customers the highest quality products with the most comprehensive service. Whether you're looking to purchase new barcode equipment and supplies or need best-in-class installation and service for your barcode products, we have a solution for you.

We specialize in nationwide barcode printer service, site surveys and end-to-end barcode solutions. Imprint's Barcode and Custom Labeling Division focuses on the following industries: manufacturing, distribution, logistic centers, food processing, co-packagers, beverage, and pharmaceuticals.

Excellent Service

At Imprint, dedicated sales representatives help you find the best solutions and strategies to improve your bottom line. In conjunction with your dedicated sales representative, inside account representatives are available to immediately assist you in following up on an order, gathering additional information, requesting a quote, or ensuring your orders will always be fulfilled quickly and painlessly.

Customers

We have worked with a variety of distinguished clients in a number of industries, delivering nationwide sales and service to SMBs and Fortune 500 companies. With pre sales technical engineers, deployment and installation services, free level-one technical support, and depot and on-site service contracts, Imprint Enterprises has the expertise to keep customers satisfied.

Imprint Top Picks – Barcode Printers

Although we offer a wide range of barcode printers from some of the best manufacturers in the industry, our customers have chosen five from Zebra Technologies that stand out.

ZT600 Series Industrial Printers

- Ideal for printing on chips, circuit boards and miniature components
- Improved, precise registration ensures quality high-resolution printing
- Field-installable media handling, connectivity, print resolution, and RFID
- Ruggedized construction for durability and long life

ZT510 Industrial Printers

- Thermal transfer or direct thermal printing
- 512 MB RAM memory; 2 GB on-board linear flash memory
- On-site or remote routing management with Link-OS capabilities
- High-quality print mechanisms and internal components

ZT410/420 Industrial Printers

- Easy to use LCD graphical user interface
- Open operating architecture provides optimum flexibility for businesses
- USB host port for intuitive printer configuration
- Metal frame and media cover provide extra durability

ZD620 Industrial Printers

- Wide range of 1D and 2D barcodes, fonts, and graphics
- Easy integration and management with Zebra's cloud-based Link OS environment
- Backwards compatibility and support for multiple printer languages
- Five intuitive maintenance status icons

QLn Series Mobile Printers

- Rugged, drop-resistant mobile printers that work in any environment
- Eliminate lost productivity with a smart battery that indicates power/health levels
- Improved communication with industry-leading handhelds
- Boost efficiency with the large display and impressive printing speeds

Zebra 600 Series

Upgrade from the Xi Series with Next-Generation Technology

Zebra's ZT600 Series is a next-generation replacement for the Xi Series. Delivering exceptional performance combined with rugged durability, these innovative go-getters are well-equipped to assist you when navigating the quickly evolving business landscape.

Zebra ZT610 Product Features

- Ideal for printing on chips, circuit boards, and miniature components
- Improved, precise registration ensures quality high-resolution printing every time
- Media handling, connectivity, print resolution, and RFID are field-installable
- Icon-based user interface and path lights for quick corrections to media and ribbon errors
- Comes with standard communication options (USB, serial, Gigabit Ethernet, and Bluetooth ® LE). Parallel, 802.11a/c with Bluetooth ® 4.0, USB Host, and IPv6 connectivity options also available
- Ruggedized construction for unparalleled durability and long life

Zebra ZT620 Product Features

- Perfect for applications that require labels as small as 3 mm
- Reduced implementation and maintenance hassles due to field-installable media handling, connectivity, print resolution, and RFID
- Color-coded and illuminated media and ribbon paths, as well as onboard alarms and resources
- Cloud-accessible Link-OS allows customers to gain real-time insight and manage critical operations on-site or remotely

Zebra 510 Industrial Printer

Affordable Next-Generation Printing Power

The Zebra ZT510 industrial printer was built on the legacy of Zebra's 105SPlus printer. Set at a price within a cost-conscious company's budget, the Zebra ZT510 provides all the printing power needed for manufacturing and transportation/logistics applications. The ZT510 is equipped with a fast processor that enables quick throughput of the most complex graphics. With upgradable hardware, seamless integration with common device management software, and the ability to streamline software updates with easy-to-use Link-OS applications, the ZT510 is perfectly adaptable to shifting business needs.

Durable, Reliable Solution for the Toughest Environments

The Zebra ZT510 industrial printer boasts an all-metal design, rugged construction, and sealed dome buttons that resist damage from dust, dirt, and moisture. With a durable design and advanced management and monitoring capabilities, the ZT510 will provide 24/7 reliability to keep your operations running as smoothly as possible and the longevity to handle the challenges of the future.

Zebra ZT510 Industrial Printer Features

- Thermal transfer or direct thermal printing
- 512 MB RAM memory; 2 GB on-board linear flash memory
- High-quality print mechanisms and internal components ensure flawless round-the-clock performance
- Link-OS capabilities support on-site or remote routing management, firmware updates, printer configuration, and more through single cloud-based application
- Standard communication options (USB, serial, Gigabit Ethernet, and Bluetooth ® LE) for easy integration into existing systems and connection to various networks
- Parallel, 802.11a/c with Bluetooth ® 4.0, USB Host, and IPv6 connectivity options also available

Imprint Enterprises offers industry-leading barcode software and automation solutions, as well as installation and custom integration services, that can meet your unique business needs. Our partnerships with leading barcode label software companies allow us to provide best-in-class label generation and automated label printing solutions for any size business.

Our Label Generation Software Company Partners

- BarTender™
- NiceLabel™
- Teklynx™

The Benefits of Barcode Label Software

- Built-in templates to enable quick custom label, tag, badge and coupon creation
- Continued serial number feature that automatically tracks and prevents gaps and errors
- Elimination of manual processes and options for integration with your product database

Integrate with Your Existing ERP Software

Barcode ERP integration links printer operations with other supply chain management and ERP solutions to improve efficiency across your operations. Imprint Enterprises' barcode label printing solutions are compatible with most well known ERP software providers for a total solution to fit your business.

Barcode Label Printing Software

Imprint offers businesses industry-leading barcode software and automation solutions that improve productivity and increase efficiency. Let us assist you in deploying your next application. With over 40 years of experience, our team of experts can design a custom application that fits the exact specifications your business requires.

Integrated Label Printing

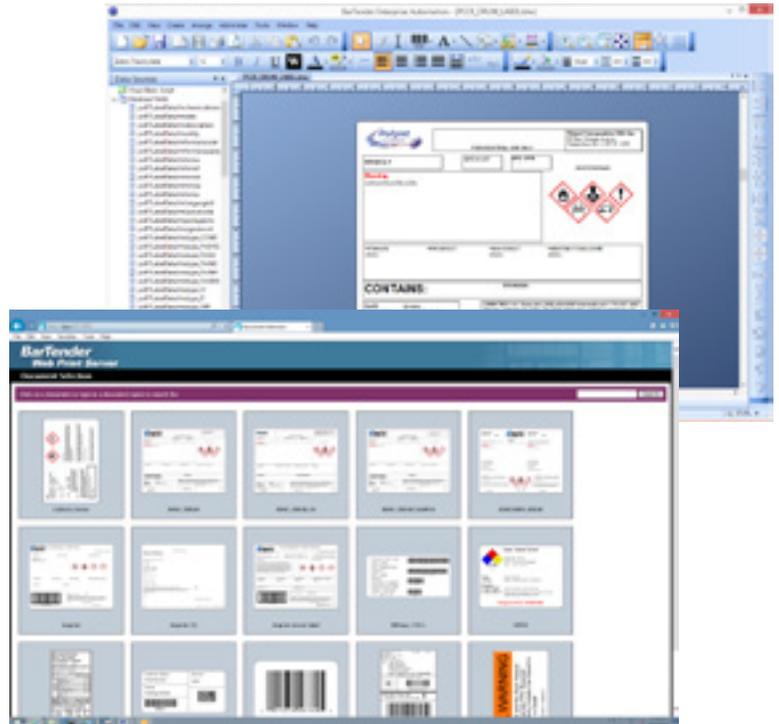

Integrate label printing operations with your supply chain management or ERP solution to improve efficiency, accuracy, and reliability.

Barcode & Automation Software

Industry-leading barcode software and automation solutions designed to meet the needs of any business.

Label Printing Automation

Label printing automation solutions that greatly improve the efficiency of an enterprise's operations.

Imprint has developed partnerships with some of the most trusted barcode label software options in the industry, including:

NiceLabel

Professional barcode label design and printing software that also supports thermal transfer printers, databases and offers open connectivity.

BarTender

Software from Seagull Scientific that helps organizations create/automate barcodes, RFID tags, labels, and more to improve efficiency and security.

Cab Printers

We partner with Cab to offer top-of-the-line printing options. These printing solutions are ideal for GHS label printing and other compliance label requirements. Imprint has helped companies in a wide variety of industries comply with the latest industry labeling requirements.

Cab XC Series

The Cab XC series features two thermal transfer printers that have the capability of printing two colors on a label at the same time.

- Meet the conditions for the GHS standard
- Can handle 300 mm diameter label rolls
- Durable metal housing
- Support for peripherals

SQUIX Label Printers

These flexible printers are a good fit for a wide range of industrial applications as they have been developed with a focus on easy and convenient operation and high reliability.

- Fast, reliable printing
- Compact design
- Easy operation
- High quality label printing

Imprint Enterprises partners with Epson to offer efficient, reliable and rugged industrial color printing solutions. These state-of-the-art printers enable you to eliminate two-step printing processes and preprinted label stock, while enabling you to easily comply with regulatory or industry label requirements. These solutions also come equipped with easy-to-use **Wasatch SoftRIP Label Edition** software for precise color matching.

EPSON

Epson C831

An inkjet printer with industrial-strength construction and suited for GHS label printing

- Can print large format GHS labels for drum and chemical labeling
- Reaches print speeds of 3.6 inches per second
- Guarantees over 600,000 high-quality prints
- High-capacity ink cartridges

Epson C3500

Efficiently prints durable, high-quality labels, minimizing costs

- Compact, yet sturdy design
- Can print up to 4 inches per second
- BS5609 certified
- Four-color inkjet printing

Epson C7500

Best in class endurance and dependability for color label printing

- Rugged design is ideal for extreme environments
- Prints durable labels that won't fade or smear
- Integrates seamlessly into existing workflow
- Minimizes user intervention and waste

Epson C7500G

Ideal for high print quality and glossy media applications

- Offers consistent and reliable printing
- Reaches print speeds of 11.8 inches per second
- Intuitive setup and integration
- Eliminates label waste and reduces label inventory

Color Printing

We have partnered with companies like Cab and Epson in order to offer top of the line color printing options to our customers.

Chemical/GHS

We offer a combination of color printers and labels that allow customers to efficiently create durable GHS labels.

Food

Whether you are in need of custom food labels, ingredient labels, or nutritional labels, Imprint Enterprises has the color printing expertise to deliver the perfect solution.

Beverage

We leverage quality materials to create durable color printed labels, preventing images and text from running, smudging, or peeling.

Medical/UDI

Our color printing solutions make it easy to print the labels your business needs as well as keep up with UDI compliance requirements.

Applicators

At Imprint, supporting our customers before, during and after the sale is paramount. Our design and management team will aid you through the design and engineering phase of each project through the final system set-up and certification. From semi-automatic applications to the most demanding high speed, high accuracy labeling solutions, we understand your needs. More importantly, we understand how to convert your needs into successful production!

Print Engines/Repair Services

Imprint Enterprises has carefully selected print engines for our customers that rely on mission-critical print and apply operations. We partner with industry leaders to provide you with print engines that will keep your operations running with minimal downtime.

Zebra ZE500

The Zebra ZE500 was designed with customer feedback on ease of use, integration and maintenance in mind. It delivers reliable performance, even in the most demanding environments.

- Thermal transfer or direct thermal printing
- All-metal construction
- Right- or left-handed
- Applicator interface
- Compatible with RFID protocols
- Variable RFID settings to support a wide range of tags

SATO S84

The SATO S84 print engine is designed for high-volume, high-speed, 24/7 print and apply applications. It features advanced, state-of-the-art technology, but it is also easy to use and maintain.

- Multiple on-board interfaces
- Standard emulations: SZPL, SDPL, SIPL
- Multinational language support
- Two-color Status LED and LCD
- Standalone Mode Support
- Download or upload settings or data via SD or USB
- Easy Printhead and Roller Replacement
- Replace or Clean Sensor Cover without tools

Repair Services

Imprint Enterprises understands that print engine downtime has a cost. Trust our trained, certified technicians to provide comprehensive on-site service to businesses in the Chicagoland area to keep your print engine maintained and to make repairs quickly and efficiently.

In-Line Systems

Imprint carries a full range of in-line coding systems. We carry small character inkjet, large character case coders, laser systems, as well as in-line flexible packaging printers.

Small Character Inkjet: Continuous Inkjet

- High Speed
- Reliable
- Easy to Maintain

Large Character Case Coders: Drop On Demand

- Barcode Capable
- Reliable and Easy to Maintain

Flexible Packaging Printers & Ribbons: Thermal Transfer Overprinters

- Prints Directly on Films
- No More Messy Liquid Ink
- Easy to Use Supplies

Barcode Printer Repair

Factory Trained and Service Repair Authorized

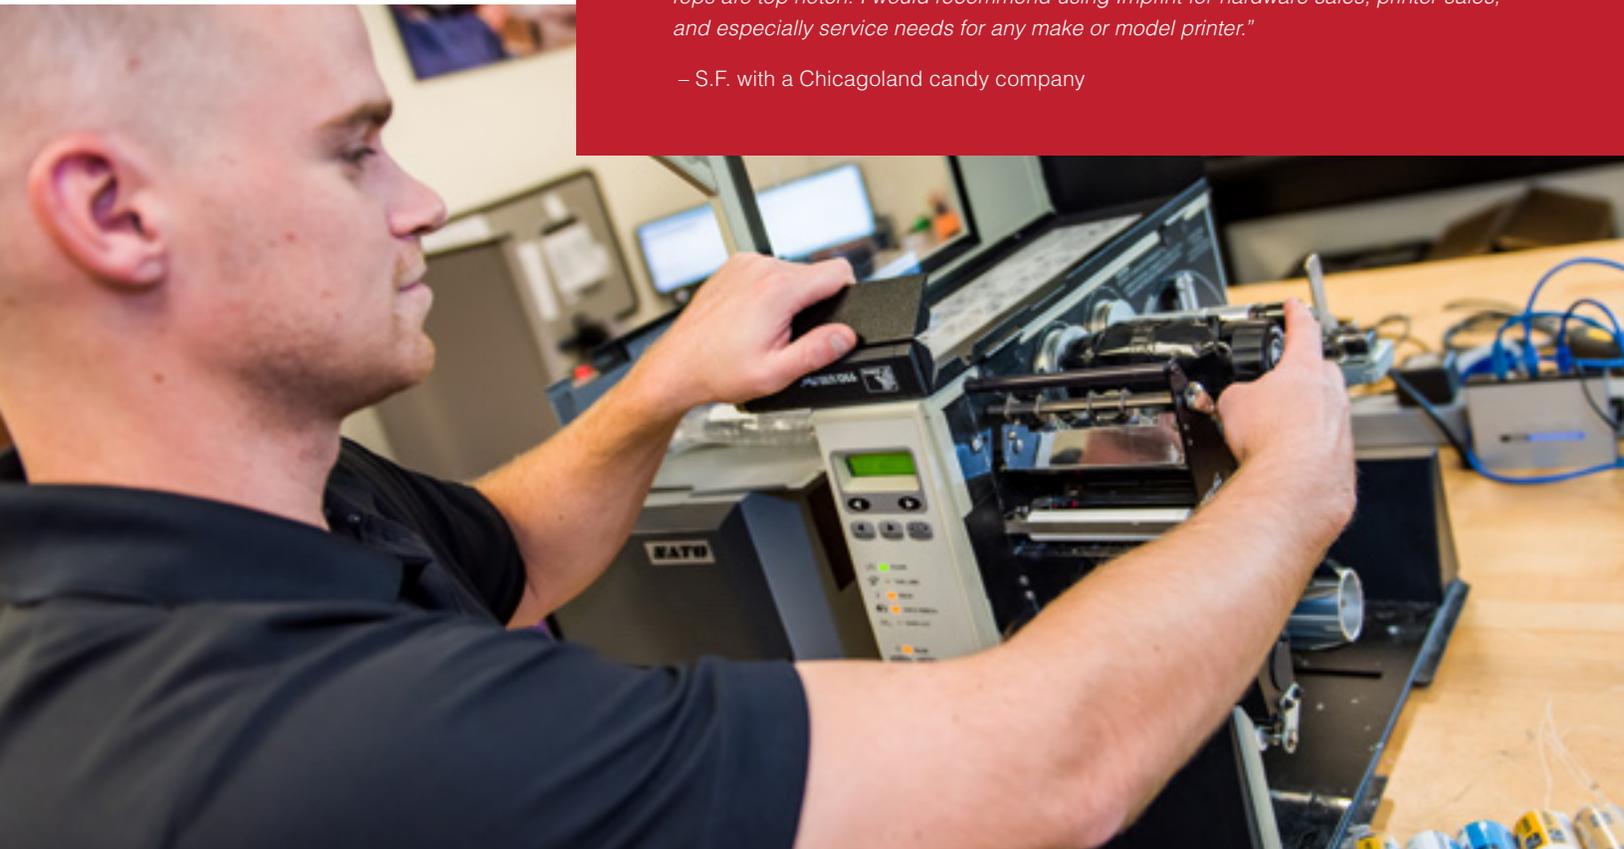

Protect your printer hardware with per instance time and material and depot service contracts or annual service plans from Imprint Enterprises. In the event of malfunction or breakdown, service options serve as “insurance” for your equipment, minimize downtime, and save you money. Complete repair security provides peace of mind for your business.

Our certified technicians are experts in barcode printer repair and excel at helping customers choose the service level that is most economical and maximizes uptime. Imprint’s barcode printer repair services exceed industry standards and specifications, so customers know how committed we are to the repair process.

“Our 10+ years of business with Imprint has been spectacular. Pricing is spot on with the industry, the service techs are fast, efficient, courteous and professional, and our sales reps are top notch. I would recommend using Imprint for hardware sales, printer sales, and especially service needs for any make or model printer.”

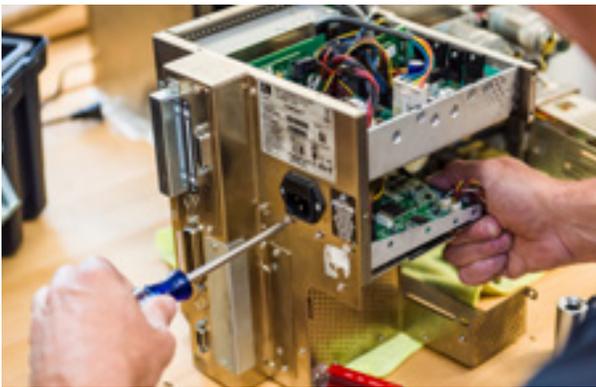

– S.F. with a Chicagoland candy company

Time and Material

- 24-48 hour response time
- No contract needed
- On-site service throughout the USA, Canada, and UK
- A “pay as you go” approach

Depot Service

- Repairs performed within 48 hours of approval
- No contract needed
- Depot service throughout the USA, Canada, and UK
- Logic board repair (component level) available

On-Site Service Contract

- 24 hour call center
- 9x5 or 24/7 contracts
- Guaranteed same day, 24 or 24-48 hour arrival contracts
- Parts and travel included in contract
- On-site service throughout the USA, Canada, and UK

Barcode Ribbons

We ensure you get quality printouts with high quality barcode ribbons for any application. Imprint only sells premium grade ribbons designed to meet or exceed the OEM specifications. Whether you need wax, wax-resin, or resin ribbons, we have a solution for you. If you aren't sure which ribbon is best for your application, our barcode experts can help you select the quality product you need.

We offer four main types of thermal barcode printer ribbons in a variety of subsets:

- **Wax**, commonly used with high-speed printers in shipping label, carton label and retail bag applications.
- **Wax-Resin**, which creates a smear-proof, high-quality image on smooth, coated paper, synthetic, or colored labels.
- **Full Resin**, which, when used with polyester or synthetic media, produce labels that are extremely durable and resistant to moisture, chemicals or heat.
- **Flexible Packaging**, which can be used with variety of flexible materials, such as BOPP film, metalized polypropylene, and coated and uncoated paper stocks, producing clean, smudge-free images at high speeds.

Zebra Certified Supplies

Zebra Certified Supplies provided by Imprint Enterprises are carefully designed, consistently manufactured, and thoroughly tested to ensure reliable, high-quality label production.

Choosing Zebra Certified Supplies also makes your business eligible for a variety of money-saving promotions, such as:

Zebra Printhead Protection Program

If your business exclusively uses Zebra Certified Supplies, it may qualify for free printhead replacement. This program takes all the worry out of having to experience downtime and unexpected costs when a printhead fails, and it also lowers total cost of ownership of your printers. Printheads — and the printer itself — will most likely last longer when you use Zebra Certified Supplies designed for your printer. Contact Imprint Enterprises for assistance applying for the program.

Free Zebra Custom Media Dies Promotion

When you purchase Zebra custom labels, tags, or wristbands, your business is eligible for free dies from Zebra through the Free Zebra Custom Media Dies Promotion. Imprint Enterprises can help you choose the optimal custom solution from Zebra's wide range of capabilities including custom sizes, colors, perforation and lamination. Imprint can also arrange for testing to ensure your custom solution meets your specifications and inventory management for your custom order.

Free Freight on Custom Label Orders

Custom label orders of \$250 or more are eligible for free ground transportation. This offer also includes free dies on all new labels. Offer is extended to both new and existing customers.

ARMOR Thermal Transfer Ribbons

Imprint Enterprises offers ARMOR thermal transfer printing solutions to enable you to produce quality barcodes, labels and tags. ARMOR is a leading provider of wax, wax-resin, and resin ribbons for use with your industrial thermal transfer printer or print-and-apply system.

ARMOR solutions are compatible with a variety of print media including:

- Coated paper
- Polyester
- Textile
- Vellum
- Polypropylene
- Bags or flexible packaging

When you choose ARMOR Supplies provided by Imprint Enterprises, you receive:

- Expert assistance with ribbon and media selection
- Thermal transfer ribbons produced in identical, repeatable processes for high quality product standards
- Supplies produced with sustainable corporate, economic, and environmental policies
- Working with a printing supplies company with a customer satisfaction rating of 96.9%

Imprint Top Picks – Supplies

Selecting the ideal barcode supplies for your business can sometimes be overwhelming, but our customers have determined that supplies from ARMOR and Zebra are some of the best in the industry.

ARMOR Thermal Transfer Ribbons

- **Wax Ribbons:** Wax ribbons from ARMOR are ideal for a wide range of label materials, are suitable for coated and vellum papers, and tend to be the most economical solution.
- **Wax/Resin Ribbons:** Their wax/resin ribbons are ideal for premium applications because they produce high-quality results, are smudge-resistant, and the backcoating tends to be extraordinary.
- **Resin Ribbons:** These resin ribbons are best utilized for the most demanding applications because they are extremely resistant to smudging, high temperatures, and solvents as well as detergents.

Genuine Zebra Media

- Genuine Zebra labels are all pre tested for ensured quality, utilize consistent materials and processes, and meet the needs of most applications and budgets.
- These labels come in rolls that are easy to install and offer plenty of space for customized label designs and standard shipping labels.
- Perfect for black, high-contrast, or visible light images and cold temperature applications.
- Zebra ribbons

Stock Labels

Imprint's stock barcode labels are available and ready to ship – many on the same day – to meet your traceability needs.

- Perfect for warehouse settings and large industrial facilities, such as chemical, food, medical, beverage, pharmaceutical
- Available in variety of sizes, colors, and material types
- Over 750 different types available from industry leaders
 - Thermal transfer
 - Direct thermal
 - Synthetic
 - RFID
- Imprint stock barcode labels meet or exceed OEM standards

Imprint Enterprises partners with leading national stock label suppliers

- Certified Zebra™ Supplies
- Intermec™
- Genuine Checkpoint and Sensormatic
- Datamax™
- SATO™

"From beginning to end, the ordering process is simple, fast and painless. Imprint's great customer service, consistent products and fast shipping have allowed us the flexibility and efficiency to meet and exceed our customers' demands while remaining competitive and successful in our industry."

– Jaime C. at a large food processing facility in Columbus, Ohio

Barcode Labels

Our stock barcode labels are available using a variety of barcode labeling technologies. Choose the solution that's right for your application.

Custom Labels

- Asset tags and labels
- Sequentially numbered/barcoded
- Durable materials
- Tamper proof
- Available in up to ten color printing
- Process color
- Comprehensive list of materials, sizes, symbologies and colors
- Custom barcode labels can be tailored to any application

Regulatory Labels

Imprint Enterprises will help you meet the labeling regulations of your industry including:

- USDA
- GHS Solutions
- UDI Labels
- UL/CSA

With label production locations in San Diego, CA, McAllen, TX, Greenville, WI, and Atlanta, GA, Imprint Enterprises stock and custom label media production is available Nationally.

Prime Labels

Prime Labels for Finished Goods

Let your finished goods stand out with Imprint's pressure sensitive labels.

Imprint's reputation for quality, attention to detail, craftsmanship and outstanding service has been recognized by the greatest household brands for almost two decades. Imprint delivers customized prime label solutions through its unique combination of flexographic and digital offset printing technologies. By employing multiple printing technologies, Imprint can service all of your prime label branding needs, no matter the size or design requirements of the brand.

To support these printing technologies, Imprint has a dedicated and experienced team eager to understand your needs and help you exceed your prime label branding goals. The Imprint team supports your project at every step, from initial design through prime label application.

Finishing Processes

Wellness Product Labels

Food Product Labels

Facility Products

At Imprint, we know that warehouses, distribution centers and manufacturers have high demands for clear organization and efficient labeling systems. We offer a wide variety of labels and ensure that our customers get complete, customized solutions for all of their facility labeling needs. From the initial consultation to the installation, we'll work with you to create facility labels that are specifically designed to meet the needs of your business.

Warehouse Rack and Bin Labels

Whether you need cold storage rack labels, magnetic rack labels, cover-up rack labels or polyester rack labels that are longer-lasting and more durable than traditional paper rack labels, you can find what you need for your application, at a competitive price, and available for quick shipment.

Floor Labels and Kits

Our durable floor labels and kits provide safe and reliable location marking for your facility. You can place a floor label anywhere it's convenient, and changing a label is as simple as popping it out of the frame and inserting the new one.

Warehouse Magnets

Imprint offers warehouse magnets for any application you can imagine. Constantly changing labels in your warehouse can be difficult and often leaves behind sticky remnants of the adhesive. Warehouse magnets provide a temporary or adjustable solution for your application.

Long Range Retro Reflective Labels

Long range retro reflective labels are coated with a polyester-based material, blended with microscopic glass beads that reflect the scanner's laser, much like a mirror. This reflective material enables your current scanners to reach much greater distances—as far away as 50 feet!

Warehouse Labeling

Warehouse Signs

Imprint offers a variety of warehouse signs for warehouse location and long range scanning purposes.

To keep your warehouse running at peak efficiency, you need to ensure your staff can quickly navigate your facility with highly visible warehouse signs. Whether you're in the early stages of implementing a WMS system or upgrading an existing facility, hanging warehouse signs can be engineered to fit your building design and improve your picking, packing, and shipping operations. We offer everything from warehouse aisle signs with polyester or retro-reflective labels for a professional appearance, bent warehouse signs for ultimate visibility, and flat warehouse signs as a fast, inexpensive solution. Imprint can guide you to the solution that works best for your facility.

Hanging Signs: For those warehouse locations that are difficult to label, such as bulk floor signs or aisle identification signs, we can custom design a hanging placard or aluminum sign that best meets your unique application.

Bent Signs: No matter what your scanning requirements are, we will assist you with a sign or label combination that will enable you to work around high ceilings, narrow aisles, and poor lighting conditions to ensure reliable data collection and tracking.

Flat Signs: Flat signs are inexpensive, easy to mount, and can be manufactured with a custom long range barcode label and delivered to your location in a short time – regardless of the desired quantity.

Aisle Signs: Imprint will assist you in designing a custom warehouse aisle sign that will set your facility apart. You can customize the right combination of polyester or retro reflective label materials, barcode type, lettering, color tabs, and mounting applications.

Power Carts

Increase your overall employee and facility productivity by converting a stationary workplace to mobile without major changes to your software, infrastructure, or processes. Empower your employees to access valuable data from anywhere in the facility using mobile workstations. Imprint can customize mobile powered workstations to suit your specific needs with our growing line of modular accessories.

EC Series

The entry-level EcoCart is lightweight, compact, and ideal for powering a laptop, barcode printer, and scanner, for 8+ hours at a time.

Features include:

- Easy access power strip
- Optional pegboard organization system
- Optional slide-out keyboard tray, printer tray and scanner holder
- Adjustable middle shelf

Heavy-Duty PC Series

The PC Series mobile powered workstation has been designed to hold and power a variety of equipment, and it also provides generous space to hold inventory.

Features include:

- Rechargeable power with ability to run several devices at once for 8-12 hours of normal use
- Heavy-duty model with weight capacity of 500 lbs and plenty of shelf space for inventory
- Also available with 48" shelves
- Easily integrated with a number of optional accessories

Mid-Range NB Series

The NB Series mobile powered workstation was developed to provide true mobility anywhere in a facility.

Features include:

- Rechargeable power with ability to run 4 devices at once for 8-12 hours of normal use
- Adjust shelves in seconds on the slotted upright system
- Compatible with the Power Swap System, which offers hours of extra power with minimal downtime
- Easily integrated with a number of optional accessories

Automated Packaging Systems

AirPouch® Express 3™

Protective Packaging

AirPouch® Express 3™

Produces AirPouch air pillows

- Compact
- EZ-Tear™ perforations

AirPouch® FastWrap™

Produces bubble on-demand and tubes

- Highly flexible
- EZ-Tear™ perforations
- Compact

EarthAware Media

An environmentally responsible approach to consumables

- Bags
- Tubes
- Pillows
- Bubble on-demand

Baggers & Bag Printing

Autobag PaceSetting PS 125™

Easy to use and maintain tabletop bagger.

- All electric
- Compact
- Prints high-res graphics, text and barcode directly on bag

Autobag PaceSetting PS 125™

Autobag AB 255™

One-step, wide bag packaging for e-commerce, mail order, and short-run applications.

- Prints 30 bags per minute
- Prints next bag, no product queue
- Easy maintenance
- Integrates with shipping or customer databases

Autobag AB 255™

Autobag FAS SPrint Revolution™

Side pouch food bagger featuring maximum speed and reliability.

- Food-grade construction
- Operation up to 900 inches per minute
- Continuous, intermittent, or batch modes
- Advanced technology for airtight seals

Autobag FAS SPrint Revolution™

Custom Integration

We'll design and build custom:

- Bagging systems
- Feeding and accumulation for protective packaging systems

Barcode Scanners

1D and 2D Barcode Scanners

True enterprise mobility starts with capturing data in real time, at the point of business activity, with accurate and reliable barcode scanning hardware.

Barcode scanners have undergone a tremendous evolution over the past decade. Scanners are no longer a “one size fits all” solution; a wide range of both laser and imaging scanners are available for reading an array of 1D and 2D barcodes in retail, warehouse, delivery, healthcare, sales, and other applications. Imprint Enterprises offers the industry’s most robust and innovative line of handheld, fixed-mount, and machine vision 1D and 2D barcode scanners that can help you improve efficiency, save time, and minimize errors in any environment.

Honeywell

Honeywell Granit 1911i

Handheld Scanners

Handheld barcode scanners are a critical component of any automatic data collection solution. Imprint’s selection of handheld barcode scanners includes both wired and wireless devices that can provide standard range, near-range, and long-range scanning capabilities.

Honeywell

Honeywell 7820 Solaris

Fixed-Mount Scanners

Our line of fixed-mount barcode scanners provides ergonomic scanning for retail POS, shipping/receiving, manufacturing, conveyor lines, and other applications. We provide scanners from leading manufacturers in a variety of sizes and configurations including laser and imaging scanners.

COGNEX

Cognex In-Sight 5000

Machine Vision

Imaging-based machine vision scanners can automatically extract information from digital images or barcodes on a conveyor system or assembly line. We provide solutions from leading manufacturers that can be used for label inspection, packaging inspection, and other applications.

The verifiers provided by Imprint Enterprises measure 1D and 2D barcodes and direct part marks (DPM) against standards including GS1, HIBC, USPS, ISO/IEC 12514/15416, and FDA UDI.

Industry-leading Barcode Verifiers

MICROSCAN.

LVS® Barcode Verifiers from Microscan

The Microscan LVS series offers exceptional off-line barcode verification to ISO/IEC standards.

LVS-9510 Desktop

- Verifies common symbologies without changing equipment
- Compliance with GS1 US and all other FDA regulated industries

LVS-9570 Wide Area

- Verifies large 1D and 2D symbology
- Lightweight
- Reliable

LVS-9580 Handheld

- Verifies any combination of linear, 2D, and stacked linear barcode types and DPM

LVS-9585 Handheld

- Advanced lighting options enabling users to auto-find of DPM
- Users can select the ideal lighting type for the material

COGNEX

Cognex DataMan Verifiers

Cognex DataMan 2-D Data Matrix Verifiers include lighting, camera, positioning, and software.

DataMan 8600V Series

- 30-degree dark field lighting
- Uniform illumination
- Ideal for verifying nameplates & other flat parts
- Compliant with the AIM DPM Quality Guideline 2006-1

DataMan 100 Verification System

- Fixed-mount verifier
- Adjustable 30/45-degree low angle lighting and 90-degree DOAL lighting
- Verifies codes with cell sizes as small as 7.5 mils. and as large as 1 inch or 28 mm
- ISO 15426-2 compliant

Axicon 15500 1D/2D

The Axicon 15000 series reads both 2D and linear barcodes and it can verify multiple barcodes in the same field of view.

- Verifies a wide range of codes including QR, GS1, Data Matrix, EAN/UPC, ITF-14, Code 128 and Code 39.
- Powered by USB; portable
- ISO-IEC compliant

Mobile Computers

Mobile Terminals and Computers

Mobile computers and terminals are a vital component of any wireless infrastructure because their mobility and ruggedness allow them to be taken wherever employees need to go.

They are also ideal for collecting data, accessing customer information, and completing business transactions at the point of activity. Imprint Enterprises' experts can recommend the right barcode terminal or scanner for your application and environment. Our line of rugged mobile computers includes traditional keypad handheld computers, rugged tablets, wearable computers, wireless Android devices, and vehicle-mount devices.

Zebra MC9200 and MC3300

Handheld Terminals

Our selection of leading handheld devices includes Motorola's MT2000 series batch computers, Honeywell Dolphin series computers, Zebra MC3300, MC65, MC75, MC-9000 series, and many others. These standard data collection terminals feature a variety of keypad configurations, support for multiple wireless technologies, barcode scanning and RFID capabilities, and other features.

Honeywell Thor VM3

Vehicle-Mount Terminals

We also offer an equally diverse selection of wireless and batch vehicle-mount computers, including popular lines like Honeywell's Marathon, VX, and Thor series, and Zebra's VC70 and VC80 devices. The rugged computers are available in full-screen and half-screen configurations, come with support for multiple operating systems (Win CE, Win 7), and offer a variety of mounting options. Imprint also provides mobile device management software for centralized support, along with full service and repair (both on-site and depot) for the computers.

Honeywell CK75

Industrial Rugged Computers

For the most extreme operating environments, we provide rugged terminals that are Intrinsically Safe (I-Safe) and rated IP 65/67 for resistance to damage from dust and moisture. We also offer devices specifically designed for cold chain and freezer operations (with some models built to operate in temperatures below -22°F) and for applications in which workers move between cold and warm environments. Our industrial rugged computer offerings include Honeywell's CK3, CK1, CK75, and the CN75/CN75e.

Zebra TC8000

Innovative Technology

The TC8000 Touch Mobile Computer from Zebra Technologies is the most efficient and feature-rich mobile computer in the industry. Designed to be lighter and more ergonomic than other mobile computers, the TC8000 helps make workers 14% more productive. This mobile computer features a touchscreen with customizable keyboards, voice interaction, and hands-free proximity scanning, so worker efficiency is maximized. With an IP65 rating, the TC8000 offers the durability customers expect from a Zebra device.

AML Mobile Computers

Imprint Enterprises partners to offer superior, cost-effective barcode and data collection hardware as well as exceptional support and service. For decades, AML has provided high-performance and user-friendly solutions.

The AML family of products includes:

LDX10

This affordable batch barcode scanning solution is preloaded with DC Suite software, which enable tasks such as inventory, asset tracking, shipping and receiving, and verification.

- Data uploaded when device returned to cradle via USB
- 512 MB storage memory
- 24-key, T-9-style keypad
- 2.8-inch color display

TDX20

The TDX20 is a popular choice for commercial applications that require wireless communication but need to control acquisition costs.

- Windows CE 6.0 Pro
- Internet Explorer for web-based and cloud applications
- DC Suite included for common barcode tasks
- USB cable

Scepter

For mobile computing in demanding environments, choose the rugged Scepter. This Android 6 (Marshmallow) pistol grip device runs a Quad Core 1 GHz processor.

- 5-inch touchscreen display
- Variety of scan engines available
- 5 MP camera
- Dual-beam LED flashlight

Triton

This rugged, high-value mobile computer is designed specifically for terminal emulation applications.

- Backlit screen increases visibility
- Summit radio with 802.11 bgn connectivity
- Wear-resistant keypad
- Option of auto-ranging 1D laser or 2D imaging

M7225/M7225b

The M7225 is a popular choice for retail, manufacturing and warehousing applications.

- Windows CE 6.0
- Available with Summit 802.11 abgn radio
- 1D or 2D scan engines
- 3.5-inch LCD with touch panel

Terminal, Scanner & Printer Accessories

Mobile Terminal and Computer Accessories

Imprint Enterprises offers an impressive collection of accessories for the industry's top mobile computers and terminals. These accessories provide additional functionality and durability to your current devices, improving the efficiency and productivity of your business operations.

- Antennas
- Audio accessories
- Barcode scanner modules
- Battery accessories
- Cables
- Carrying cases and accessories
- Chargers
- Cradles
- Headsets
- Imagers
- Mounts
- Mobile payment modules
- Power supplies
- Snap-ons
- Stylus

Barcode Scanner Accessories

The accessories Imprint offers for barcode scanners greatly improve the productivity of your workforce. Our wide selection of barcode scanner accessories provides the features needed for any scanning application.

- Adjusters
- Battery accessories
- Cables
- Carrying cases and accessories
- Covers and protectors
- Customer-facing scanners
- Mounts
- Power supplies
- Scale displays

To learn more about our selection of accessories, contact an Imprint expert at 855-745-4464 or visit www.imprint-e.com

Imprint Top Picks – Tablets

The market for durable enterprise tablets has grown significantly over the past few years. Although Imprint offers a collection of the industry's best tablets, the following four stand out the most:

 **ZEBRA**

Zebra ET50/ET55

- Windows or Android OS
- Accessories that enhance ruggedness and provide data capture and power management features
- Support for Wi-Fi and 4G LTE
- Touchscreen works with a gloved or gloveless finger or active or passive stylus

 **ZEBRA**

Zebra ET1

- Sleek and attractive, yet durable in extreme environments
- Data encryption that meets industry and government regulations
- WLAN or WWAN connectivity
- Removable battery that can be swapped on the fly

TOUCH
DYNAMIC

Touch Dynamic Quest III

- Windows or Android OS
- Rugged IP54 rated design and 4' drop specification
- Ultra-low power consumption and extended battery life
- 64 GB of storage and 4 GB of memory

Panasonic

Panasonic Toughpad FZ-G1

- Glove sensitive touchscreen
- 28-hour, hot-swappable battery
- Integrated RFID reader
- IP64 dust and water resistant

Imprint Top Picks – Mobile Computers

Mobile terminals and computers are more important than ever before for enterprises. Although many manufacturers have made great strides in mobile technology, here are a select few that stand out.

 **ZEBRA**

Rugged — Zebra MC9200

- Touchscreen display with a 4H hardness factor rating
- Scanner exit window made from Corning Gorilla Glass
- IP64 sealing rating and temperature rating of 4° F to 122° F / -20° C to 50° C
- Can withstand the equivalent of 4,000 3.28 ft/1m hits

 **ZEBRA**

Vehicle-Mount — Zebra VH10

- Multiple mounting options, including existing setups
- Integrated motion, temperature and ignition sensors
- Field replaceable keyboard and touchscreen
- Real time information and intuitive design boost worker accuracy like never before

Honeywell

Vehicle-Mount — Honeywell Thor VM1

- Field-replaceable front panel for easy service
- Quick Mount Smart Dock for vehicle changes in 1/6 the normal time
- Optional screen blanking to ensure maximum driving safety
- Heavy-duty construction with an IP66 sealing rating

Honeywell

Vehicle-Mount — Honeywell Thor VM2

- 9.7 inch XGA display screen
- WLAN and WWAN connectivity
- Available with wide range of Windows platforms
- Field replaceable front panel for easy service

Imprint Top Picks – Barcode Scanners & Verifiers

Enterprise mobility is rooted in the ability to capture data in real time, in the most accurate and reliable way possible. Barcode scanners are essential to this process.

Handheld — Honeywell Granit 1911i

This IP65-rated device offers best-in-class durability, decreasing repair costs and maximizing uptime.

- Bluetooth connectivity allows the Granit 1911i to operate up to 100 m from base while also reducing interference with separate wireless systems.
- The lithium-ion battery is easily removable, and a full charge allows the device to perform up to 50,000 scans.
- Easily scan items that are out of reach and scan 20 mil linear codes from a distance of 75 cm without any impact on accuracy

Handheld — Zebra DS3678

- Aggressively scans high-density barcodes and is compact enough to fit in almost any enclosure in a variety of environments.
- The built-in diagnostic indicator greatly reduces downtime by offering intuitive troubleshooting.
- Can be configured and upgraded remotely, eliminating the expenses associated with on-site service.
- Powered through serial and USB ports, so there are fewer cables to clutter a workspace.

Machine Vision — Cognex In-Sight 5000

- The die-cast aluminum housing is IP67-rated, making the In-Sight 5000 series the most durable machine vision scanners.
- Comes equipped with a library of proven tools to offer superior performance and reliability.
- Intuitive design makes it easier than ever to deploy machine vision applications.
- Easily integrates with a variety of accessories that offer additional functionality to the In-Sight 5000.

Verification — Cognex DataMan 8600

- Designed to perform in a variety of environments, including even the harshest of factory floors.
- A cutting-edge liquid lens imaging system and flexible lighting technology make the DataMan 8600 ideal for DPM applications.
- Designed to support a variety of applications – corded or cordless – to meet any communication requirements.
- Robust barcode reading technology allows the DataMan 8600 to read codes regardless of damage, perspective, distortion, contrast, or obstruction.

Ring Scanners and Wearable Devices

Pair mobile or vehicle mounted computers with a ring scanner for maximum productivity and to allow your employees to work “hands free” while still having data collection capabilities.

Zebra RS6000

The RS6000 is Zebra's most rugged ring scanner, for reliable data collection inside, on the dock, or in the freezer.

- Instant pairing with mobile computer
- Right- or left-hand operation
- Triggerless scanning
- Comfortable, hygienic mount
- High-performance battery

Zebra WT6000

The Zebra WT6000 allows for maximum comfort while achieving maximum operational efficiency.

- Multi-modal picking
- Sorting
- Loading
- eCommerce picking
- Voice picking

Wearable Devices

Imprint Enterprises offers a variety of other wearable devices that give your workforce the functionality and flexibility to maximize their productivity.

- Wearable computers
- Corded ring scanners
- Rugged headsets

Printer Accessories

Customers depend on Imprint Enterprises for accessories that increase the value of their printers, helping them last longer and perform better than ever before. Regardless of your printing needs, you'll find that we offer a comprehensive list of barcode printer accessories that optimize performance.

Cutters

These are commonly used when printing with continuous media, as well as occasions where the die cut labels lack a perforated liner.

Peelers

Peelers help separate the liner from the printed label, making it much easier to quickly apply the labels.

Printheads

Printheads create the images applied to labels. Replacement printheads are vital to performance and reliability.

Rewinders

These allow printed labels to be rewound after an initial preprint. Then, the labels can be printed again with additional information.

Platen Rollers

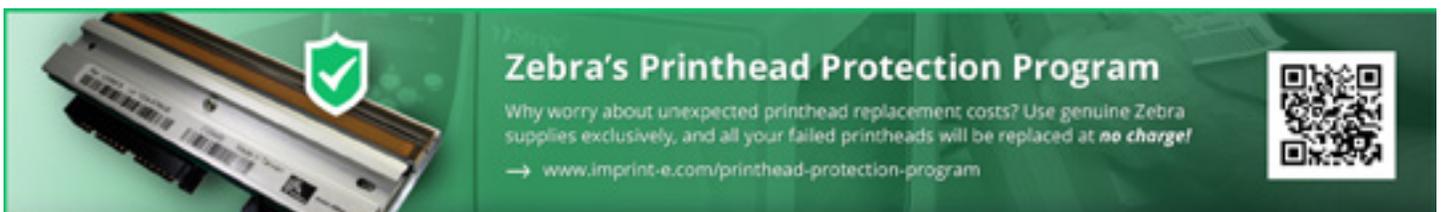

Platen rollers collect and feed the labels through the printer. Replacements help prevent paper jams and other issues.

Catch Trays

For applications where the printed labels are not immediately removed, catch trays help keep them organized.

Printer Enclosures

Printer enclosures protect printers from liquids, dust, and extreme temperatures, reducing maintenance costs and extending device longevity.

Zebra's Printhead Protection Program

Why worry about unexpected printhead replacement costs? Use genuine Zebra supplies exclusively, and all your failed printheads will be replaced at *no charge!*

→ www.imprint-e.com/printhead-protection-program

RFID technology allows you to expand the amount of data you can collect and eliminate the need to establish line of sight. Turn to Imprint Enterprises for the total RFID solution for your operation.

RFID Readers

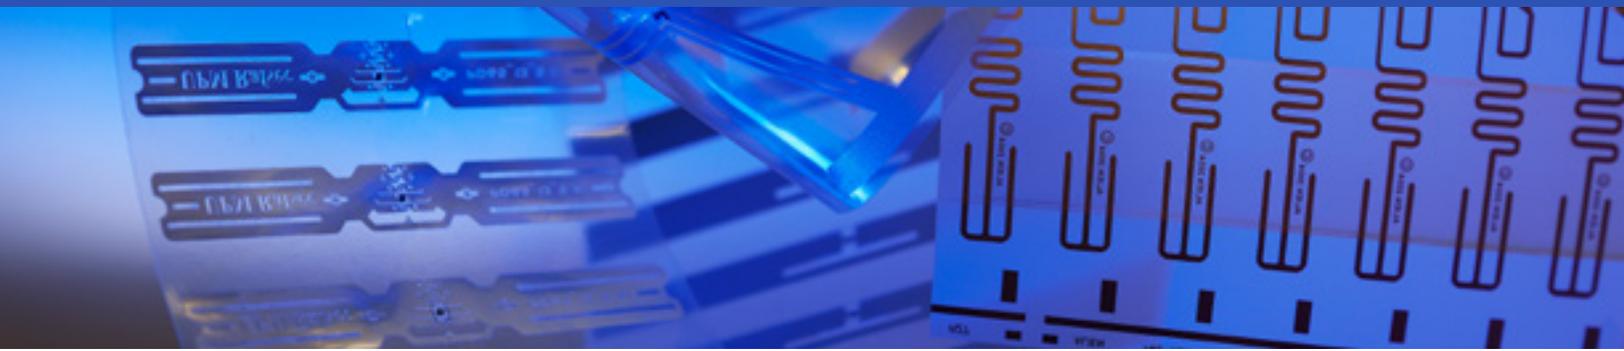

We partner with leading providers such as Zebra Technologies and Honeywell to offer a full line of RFID readers that accommodate data collection from a range of distances. Choose from handheld readers, often selected for asset tracking applications, or fixed readers to collect data as items pass by on a conveyor or through dock doors.

RFID Printers

RFID printers allow you to print and encode RFID tags to help track assets or manage your supply chain, warehouse, or yard. RFID printers are designed to accommodate media commonly used for RFID labels and tags — and to accommodate high-speed, high-volume use. Our experienced team can advise you on the model that will provide the most value to your operation.

Omni-ID's Industrial RFID Tags

IQ Tags

These low-profile, printable on-metal RFID tags from Omni-ID are user-friendly, cost-effective solutions for use in metal environments such as IT asset tracking and electronics applications.

- Passive RFID
- Thermal barcode printer compatible
- Peel and stick
- Variety of sizes and read ranges
- Industry-leading performance and consistency
- IP68 rated
- For use with flat or curved surfaces

Fit Tags

Imprint Enterprises offers the full range of Fit Tags, which include the smallest, lowest profile RFID tags available. With the ability to keep performing even when exposed to extremely high temperatures, these tags are ideal for applications including hand tools and small equipment, automotive paint processes, and medical instruments that must undergo sterilization processes. Omni-ID Service Bureau can print and encode tags at point of manufacture.

- Passive RFID
- On-metal
- IP68 rated
- Withstands temperatures of up to 455 degrees F/235 degrees C

Application Development

RFID software allows readers to decode the data stored on RFID tags and to make this data available to other business applications. Imprint Enterprises offers RFID software, integration, and application development to help you create an efficient data collection system that provides up-to-the-minute insight into your operation.

With a total RFID solution from Imprint Enterprises your operation can automate data collection, reducing the amount of handling, the time spent searching for items — and errors associated with manual processes.

Wireless Network Site Surveys

A robust wireless network is an essential tool for large and small businesses alike. In the past, quality wireless infrastructure was expensive and required extensive IT knowledge. Our partnership with Zebra has allowed us to eliminate this problem from your business. Zebra WiNG 5, designed for large and growing businesses, and WiNG 5 Express, designed specifically for businesses with fewer than 1,000 access points, make it easier than ever for you to deploy a wireless network.

Site Surveys and Installation

Imprint Enterprises offers customers comprehensive site surveys and develops plans with a tested and proven process. This process begins with a needs analysis, which is an initial assessment that accounts for your budget, any RFID compliance mandates, your compliance goals, and any other factors unique to your enterprise. The rest of the process includes a preliminary site survey to gain an understanding of the IT infrastructure and manufacturing processes and is followed by the construction of the wireless architecture and physical installation. Imprint also offers training from a real IT staff that is familiar with all aspects of wireless networking.

Custom Applications

Consultation

Our free consultation will help you assess your business's application requirements. We'll help you outline a path to your goals, determining the time frame and resources necessary.

Quality

We always ensure our solutions are top quality. We complete a thorough in-house review, including focus group testing.

Mobile Strategy and UI Design

If an app isn't easy to use, it won't matter how powerful it is. We'll help you design a user interface that's simple, sleek and intuitive.

Application Release/Deployment

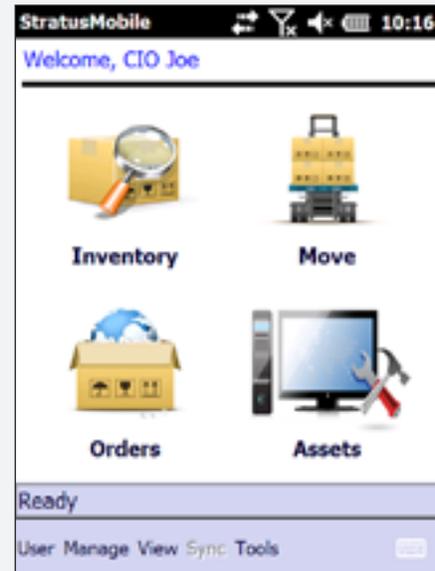

We have the know-how to get your apps deployed—whether you want us to install the applications directly on your devices, teach you how to install them yourself, or load the software to app marketplaces for install later.

Development Expertise

Our designers and programmers know HTML5 and responsive design, Javascript, AJAX, JSON, XML, C++, C#, Objective C, PHP, VB, MySQL, SQL Server, iOS, Android, Windows Mobile, Windows CE, responsive frameworks, mobile frameworks and more.

Maintenance

We provide maintenance packages for both hardware and software, so you always have the most up-to-date solutions.

Imprint offers custom mobile application development for almost any vertical market or business application. Our team can also design and program responsive websites for the internet as well as applications for Android, iOS, Windows, and more.

Our offering also includes mobile strategy, UI design, and free consultations to assess application requirements. Trust us to provide complete solutions – including hardware, software, installation, and support – that are cost-effective and have a fast time to market.

Inventory/WMS/Check-In Check-Out Software

Imprint offers some of the most trusted off-the-shelf software options in the industry, like those from RedBeam and IntelliTrack. These off-the-shelf solutions make it easier than ever to keep track of inventory, manage your warehouse, and locate assets. These software solutions can support small, individual environments, large enterprises with automated infrastructures, and anything in between.

Inventory: RedBeam Inventory Tracking

RedBeam's Inventory Tracking software allows businesses to streamline inventory processes and easily track the movement of inventory through the supply chain. Like all of RedBeam's software applications, there is a standard version as well as a mobile option. The standard edition requires the use of cabled barcode scanners attached to a workstation in order to collect data; the mobile version has this functionality, but also works with scanner-enabled mobile computers.

WMS: IntelliTrack Warehouse Management System

IntelliTrack's WMS solution is available in batch and real-time radio frequency versions and is defined by its intuitiveness, affordability, and reliability. Right out of the box, your warehouse will benefit from enhanced inventory accuracy, a more productive workforce, and improved and more efficient customer service. IntelliTrack's WMS software also includes features like directed picking and put-away, wave management, cubing, and cross-docking.

Check-In/Check-Out: RedBeam Check-In/Check-Out Software

RedBeam's Check-In/Check-Out software is perfect for businesses that struggle to effectively locate files, equipment, tools, or any asset that frequently changes possession or location. The standard edition of this software works perfectly with almost any cabled barcode scanner, while the mobile version also works with mobile barcode scanners.

Professional Services

Imprint Enterprises offers a full suite of professional services that were built to perfect solution performance and provide an improved ROI for customers. No matter which professional service option you choose, Imprint employs the most qualified support technicians in the industry, so any problems are solved quickly, installations are handled correctly, and questions are answered in a timely and informative manner.

Break-Fix

Imprint's most basic service plan is break-fix/depot repair, which allows the customer to ship broken equipment or devices to the service provider.

If customers find that equipment is not working, they can contact Imprint and then send the items in question to their repair depot. The equipment is repaired in a timely manner and then shipped back to the customer. Break-fix support provides companies with a reliable, cost-effective method of device repair as well as a feeling of comfort knowing Imprint's experienced repair team is on the job. Imprint also offers annual on-site time and material contracts that allows customers to schedule a visit from one of their trained technicians.

Consulting

Imprint leverages almost 40 years of industry expertise to provide consultations for businesses and insight on barcode, labeling, and printing solutions.

Whether your business is in need of barcode, labeling, and printing solutions as well as terminals, wireless infrastructure, and database design/data mapping from an ERP to an application, Imprint Enterprises can be your solution.

Our experienced service technicians have been tried and tested countless times, making them the best in the industry. If you would like to set up a consultation, contact us today at (855) 745-4464.

Process Flow/Application Scope and Development

An assessment of this type maps out devices, databases, systems, and more in order to identify an organization's most critical assets.

This process greatly improves the efficiency of processes and leads to a more organized enterprise. Imprint's dedicated technicians conduct thorough asset inspections to ensure that each customer can meet – and surpass – their business goals.

Wireless Site Survey

Imprint leverages a tested and proven process to offer comprehensive site surveys and infrastructure planning.

This process begins with a needs analysis, which is an initial assessment that accounts for your budget, any RFID compliance mandates, your compliance goals, and any other factors unique to your enterprise. The rest of the process includes a preliminary site survey to gain an understanding of the IT infrastructure and manufacturing processes and is followed by the construction of the wireless architecture and physical installation. Imprint also offers training from a real IT staff that is familiar with all aspects of wireless networking.

Package/Label Design and Compliance

Imprint develops custom applications to meet unique business needs and any industry/environment requirements, including GHS, UL/CSA, and customer compliance requirements.

By employing a variety of printing technologies, Imprint can ensure that any size or decoration requirements are met. To support these printing technologies, Imprint has a dedicated and experienced team eager to understand your package or label compliance needs.

Inventory Programs

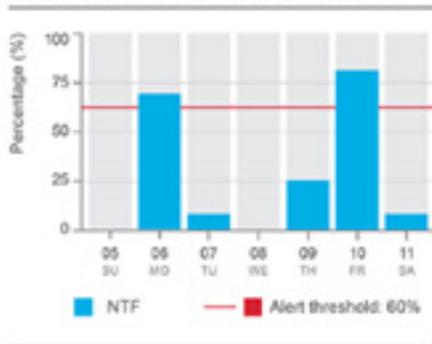

Imprint can house inventory for businesses with high-volume supplies orders, so they can have their labels when they need them.

Increase Productivity, Efficiency, and Return on Investment with Device Insight

Imprint's partnership with Zebra Technologies ensures we can offer top-quality products paired with top-notch support services to keep those products performing at optimal levels. Once of these services was created to solve "device invisibility." Device invisibility means you lack data on the location, performance, and health of your devices. To overcome this challenge, Zebra offers two types of visibility service to help you avoid disruptions, delays, and a sad device ROI.

Asset Visibility Services (AVS)

If you've invested in high-quality mobile computers and printers, that's great. But, if your devices aren't operating properly, you're losing money. Using Zebra's cloud-based Asset Visibility Platform, and an agent installed on all Zebra devices, AVS collects business-critical data and presents it on customizable operational dashboards. With this information, you will be able to track and monitor how each device is being used. You will also be alerted to potential problems, like a dying battery, and receive recommendations for solutions.

Operational Visibility Services (OVS)

OVS, in addition to the same collection and analysis data, delivers integrated, two-way, remote mobile device management (MDM) functions. With this, you gain operational insight as well as centralized control over management tasks, such as device updates, troubleshooting, security measures, and more. If you have MDM software in place already, Zebra offers OVS Connect, providing complete integration with your existing MDM platform. Zebra's visibility services ensure maximum performance, uptime, and value from your mobile devices.

Zebra OS Migration

Support for OS Migration

As the popularity of the Android operating system grows, more businesses are considering migrating to Android for their mobile deployments. Imprint Enterprises offers solutions through our partnership with Zebra Technologies that make the migration to a new OS easy and more manageable.

Mobility Extensions (Mx)

Mobility Extensions adds robust security, mobile device management, mobile application management, data capture support, and business-class Wi-Fi to Android devices to make them enterprise ready.

Mobility DNA

Mobility DNA software transforms Android to make it easier for enterprises to manage, integrate, and leverage for greater productivity. Training is quicker and easier for new employees, and communication and collaboration are streamlined. Mobility DNA also enables you to troubleshoot and correct mobility issues more quickly to avoid downtime.

Lifeguard

A part of Zebra's Mobility DNA solution, Lifeguard is Zebra's software security solution for Android. It extends the lifecycle of consumer OS support beyond the typical 36 months to allow you to use them longer and significantly lower the total cost of ownership (TCO) of your mobility deployment. Lifeguard provides periodic security updates and OS security support as you transition to a newer OS.
